

REACH SUBSTANCES OF VERY HIGH CONCERN (SVHC) COMPLIANCE

EU / EC / EEC Directives and Regulations

How does this affect Viton™ Sheet Products (solid and cellular) and its safety in application?

J-Flex works closely with our suppliers to ensure that all our Viton™ manufactured products will comply with the requirements of REACH.

Following product testing, J-Flex can confirm that **none of the substances** on the current SVHC candidate list (according to Article 57 (EC) 1907/2006), are present in reportable levels and are therefore deemed REACH compliant.

The full list of substances can be viewed on the European Chemicals Agency (ECHA) website at: <https://echa.europa.eu/candidate-list-table>

This includes the chemical intermediates / cyclic siloxanes:

Octamethylcyclotetrasiloxane (D4), CAS 556-67-2,

Decamethylcyclopentasiloxane (D5), and Dodecamethylcyclohexasiloxane (D6) CAS 540-97-6.

Partner of Viton,™ a Brand of the Chemours Company

Furthermore, all Viton™ Sheet Products (solid and cellular) distributed by J-Flex also meet the requirements of RoHS Directive 2002/95 EC, RoHS Directive 2011/65/EU and RoHS Directive 2015/863/EU.
