

FOCUS ON

FKM Sheet Products from J-Flex

Where 'Specials' are standard

This has been the compelling story throughout our proud 35 year history - just consider our latest special:

Our factory has perfected the production of calendered FKM Laminated PTFE Sheet - for those extra demanding applications where wide resistance to many aggressive chemical cocktails is required.

As we all know, PTFE gives universal resistance to most chemicals & FKM provides its own wide ranging resistance, as well as providing the energising part of the gasket.

Traditionally available in smaller moulded sheets, J-Flex can now offer calendered roll products, typically 1200/1400mm wide x 10 metre long rolls (dependent upon thickness).

Fluor-A-Com® - our flagship A Type FKM Sheet - has been independently tested in Germany against tests most relevant to gasket sealing integrity:

- Extended Compression Set
- Heat Ageing
- Swell Tests in Oils & Chemicals

In addition Fluor-A-Com® complies to AfPS GS 2014 PAK Cat 1 + Reach SVHC (EC) 1907:2006 + ROHS.

Available TODAY from J-Flex, one of Europe's largest FKM Sheet providers:

- Huge stocks - possibly the biggest in Europe.
- Wide thickness range - 0.25mm right up to 25mm!
- Many widths available - 1000mm / 1200mm / 1400mm / 1500mm.
- 10 Point Quality Assurance controlled by our ISO9001:2015 registration.
- Easy to understand Material Data Sheets.
- Definitive Guide available - FPM/FKM : What's The Story?
- Guide To Fluoroelastomers White Paper available.

J-Flex standard specials:

- Blue & Off-White FDA/EC1935 Tested Food Safe Sheet.
- Viton™ Closed Cell Sponge Sheets.
- Laminated FKM / Silicone Sponge Sheets.
- Fabric Inserted FKM Sheets.
