# J-Flex Introduces Reusable Non-Stick Baki

Using our silicone engineering expertise as well as our understanding of the requirements of food safety, J-Flex introduces **Flex-Mat**

**Flex-Mat** conforms to food standards, including FDA/NSF Regulations.

Made of fibre mesh reinforced silicone, it is available in a wide range of colours, sizes and shapes such as rectangular, square and round.

Any size up to 1.2 metre wide or diameter can be fabricated by J-Flex. Flex-Mat can be printed with your company name and logo or whatever you would prefer.

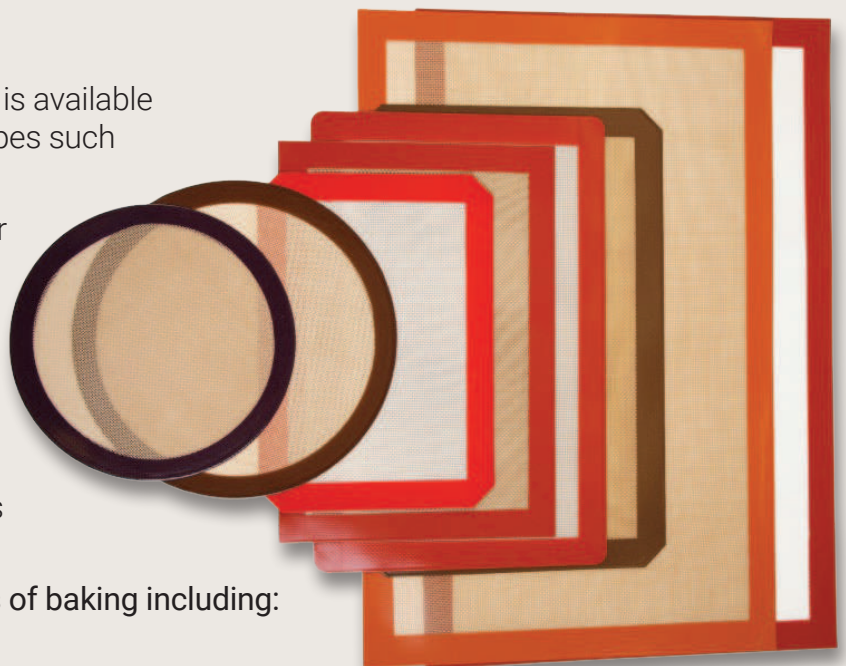

## Applications

Suitable for most ovens, J-Flex Flex-Mats are effective in temperature up to 220°C.

Flex-Mat has been designed for all types of baking including:

- Savouries
- Pastry
- Biscuits
- Tuiles
- Jelly Rolls
- Macaroons

With non-stick capabilities, it can also be used when baking with sticky chocolate, caramel and other gooey creations. Food substances can simply and easily be peeled off the mats.

## Benefits for the Baker

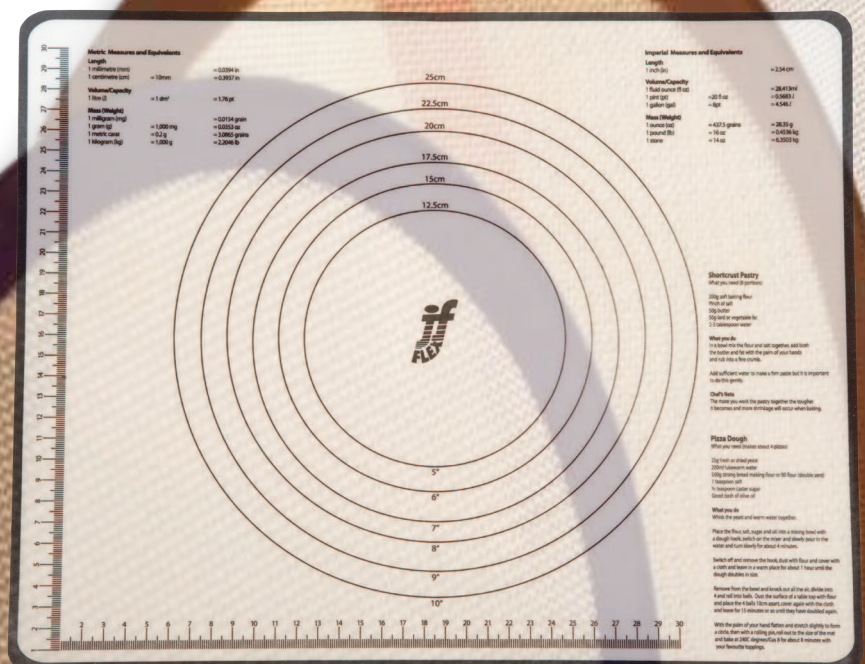

- **Perfect pastries every time** with an even transfer of heat to your baking creations
- **Great for all your baking with easy cleaning after use** - no trouble getting sticky substances off your baking trays
- **No greasing of trays required** saving on grease/butter
- **Easy to clean** - simply rinse before use and if you want clean afterwards with a mild detergent (dishwasher safe)
- **Easy to store** - simply roll up the mat to store for space savings, although you can store flat too
- **Easy to use** - Flex-Mat is flexible so pop it on a baking tray for added stability when moving your baking from the work surface to the oven and back. Any logo or writing should be face up on the tray. The sealed edges also ensure food does not spill or get trapped.
- **Long life** - durable and long lasting, you'll never need to buy grease proof paper again!

So simple  
and easy to use  
the Baker's  
Best Friend
